- **PDF:** A user can download the current dashboard or the entire report as a PDF, allowing you to print what you see.
- **Image:** This allows a user to save an image of the current graph (with filters). (You may need to click a 2nd time.)
- **PowerPoint:** A user can download the current dashboard or the entire report as a PowerPoint, allowing you to print what you see.
- **Data** (restricted): The data feeding the report will open in a new window. This data can then be downloaded as a text file.
- **Crosstab** (restricted): Transfer the data from the dashboard into Excel by selecting any of the data from the report.

EXPORTING TO PDF:

You can quickly export all or part of a workbook using the PDF command on the Download toolbar button. You can select your PDF orientation, paper size, and choose whether to print the entire workbook or selected sheets.

3. Select the PDF Option

From the Download menu, select **PDF**.

4. Select Content

Choose whether to export to PDF the current dashboard view, selected components from the current view, or selected views by doing one of the following:

10. TIPS & TRICKS:

← Revert

REVERT: This button allows the user to clear all filters and view the original report.

Resume 🔓 Pause

PAUSE/RESUME: As you interact with a report, you may find the report takes some time to update any changes made with a filter. Use the "Pause" button to pause those changes from occurring as you update the filters. Once you have selected all filters you desire, click the "Resume" button to have the report update.
